U04 PLASTIC TOTE WITH INTEGRATED LID

Plastic Boxes from MPS, are designed for manual and automatic handling in logistics centres and shipping environments. The container is perfectly stackable when empty and with the lid open, resulting in warehouse storage savings of up to 75%. Complete with security seals and document pocket, making it a suitable container for all types of shipping.

ACCESSORIES

- Bar code PET 50 white PT
- Lid closure seal: made of polypropylene, ensures that the lid is closed during transport.
- Transparent document pocket: useful for storing shipping documents, suitable for logistics installations, made of transparent, UV-resistant material.

COLOUR: In addition to the standard colour, they can be printed in any colour with a minimum order quantity of 500 pcs.

COLLECTION AND RECYCLING: In the interests of environmental protection, MPS undertakes to collect worn or damaged plastic containers free of charge. The only condition is that the plastic containers must be clean.

STACKABILITY:

Stackability recommended for transport: m 2,4 = 28 pz.
Pieces per pallet: 168 pz.
