U05 SHIP TOTE PLASTIC BOX

MPS plastic boxes are designed for manual and automatic handling in logistics centres and shipping environments.

The container is perfectly stackable when empty and with the lid open, resulting in storage savings of up to 75%.

ACCESSORIES

- Bar code PET 50 white PT
- Lid closure seal: made of polypropylene, ensures that the lid is closed during transport.
- Transparent document pocket: useful for storing shipping documents, suitable for logistics installations, made of transparent, UV-resistant material.

COLOUR: In addition to the standard colour, they can be printed in any colour with a minimum order quantity of 500 pcs.

COLLECTION AND RECYCLING: In the interests of environmental protection, MPS undertakes to collect worn or damaged plastic containers free of charge. The only condition is that the plastic containers must be clean.

STACKABILITY:

Stackability recommended for transport: m 2,4 = 28 pz.
Pieces per pallet: 168 pz.
